

SanketKumar Zanzmera

Cybersecurity Analyst | SOC Analyst

Ahmedabad, Gujarat, India | sanketzanzmera@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Cybersecurity-focused MSc IT student pursuing a career as a SOC / Cybersecurity Analyst, with hands-on grounding in security monitoring, log analysis, and SIEM concepts through Windows security event investigation. Practiced in incident investigation fundamentals, the Cyber Kill Chain, and MITRE ATT&CK technique mapping, supported by working knowledge of networking and Linux. Builds on this with applied cybersecurity labs and academic projects, plus a background in Python and data analysis from prior internship work.

TECHNICAL SKILLS

Cybersecurity: SOC Operations, Security Monitoring, Log Analysis, SIEM Concepts, Incident Investigation, Cyber Kill Chain, MITRE ATT&CK, Windows Security Events, Security Event Analysis

Security Tools: Splunk, Nmap, Metasploit, Burp Suite, Wireshark, John the Ripper, Hashcat, Kali Linux, Docker

Programming & Development: Python, Java, C, Django, Flask, SQL, HTML, CSS, Bootstrap

Data & Databases: Pandas, NumPy, Matplotlib, SQLite, MySQL

Cloud & Big Data: AWS (EC2, VPC, S3, EBS, DynamoDB), Hadoop, HDFS, MapReduce, Apache Spark, PySpark

Operating Systems: Windows, Linux, Kali Linux, Ubuntu

Additional: Git/GitHub, REST APIs, Django REST Framework, Linux Command Line, VirtualBox, WSL2

EXPERIENCE

Web Development Intern (Part-Time) — Women Life Empowerment NGO

Jul 2026 – Present

- Contribute to web application development and maintenance using Python and Django.
- Work with Django models, views, URLs, templates, forms, and database operations.
- Use SQLite for application data storage and management.
- Develop responsive web interfaces using Bootstrap.
- Implement, debug, and improve existing web application features.

Data Science Intern — Maxgen Technology Private Limited, Ahmedabad

Jan 2025 – Jun 2025

- Worked with Python-based data processing and analysis workflows on structured datasets.
- Used Pandas and NumPy for data manipulation, cleaning, and analysis.
- Applied Python programming to practical data science activities.

CYBERSECURITY PROJECTS

SOC Sentinel — Real-Time Security Monitoring & SIEM Platform (Featured)

- Built a security monitoring platform for centralized log collection from multiple sources into a single dashboard.
- Implemented alerting on security-relevant activity to support analyst investigation and follow-up, applying core SIEM concepts.

Windows Security Log Analysis with Splunk

- Ingested Windows Security Event Logs into Splunk and built SPL queries to filter authentication-related events.
- Investigated logon activity using Event IDs 4624 (Successful Logon), 4625 (Failed Logon), and 4672 (Special Privileges Assigned).

Cyber Kill Chain & MITRE ATT&CK Analysis

- Mapped a documented attack scenario across the stages of the Cyber Kill Chain, from reconnaissance to actions on objectives.
- Cross-referenced attack behaviors against MITRE ATT&CK techniques to identify potential detection opportunities.

SOC Level 1 Manual Log Investigation

- Manually analyzed Windows and Linux security logs to identify suspicious authentication and security-related activity.
- Applied SOC Level 1 triage methodology and documented investigation findings and reasoning.

AWS Cloud Infrastructure Practicals

- Provisioned EC2 instances with Elastic IP and EBS storage, secured with configured security group rules.
- Designed a VPC with public and private subnets and a NAT Gateway, with S3 and DynamoDB configuration.

CYBERSECURITY LAB & HANDS-ON PRACTICE

Applied, self-directed practice with Kali Linux, Splunk, Windows Security Logs, SIEM concepts, Nmap, Metasploit, Burp Suite, Docker, DVWA, and Hadoop/Spark for data-heavy security scenarios.

CERTIFICATIONS

Become Next-Generation Ethical Hacker with AI — WsCube Tech — Issued September 2026 — Credential ID: WS/2026/M/64624

How to Become a Certified SOC Analyst in 2026 — WsCube Tech — Issued September 2026 — Credential ID: WS/2026/M/63909

EDUCATION

Master of Science — Information Technology, Gujarat Vidyapith

Jul 2025 – May 2027

Currently Pursuing

Bachelor of Computer Applications (BCA), Gujarat Vidyapith

Jul 2022 – May 2025

First Class
